This item was taken from a copy of the Huntingdon Daily News of 52 years ago: "On Saturday night, Dr. William Trout was called upon to visit Mrs. Adam Gress of Todd Township, who had accidentally swallowed a set of false teeth. Upon arriving, the doctor found that the lady, who used a set consisting of three or four teeth on a small plate had actually swallowed them. They lodged at the entrance to the stomach. Question was how they were to be extracted. The doctor did not have with him the instruments generally used in such cases and was at a loss as to how to proceed. He at length hit upon an expedient method. Procuring some sewing silk, he tangled it into a knot and having attached a string to it, requested her to swallow it. This after some difficulty she succeeded in doing and the silk became entangled with the teeth, then all that remained to do was pull them out by the string. A case like this probably has never occurred in this section."
